page | **3** 

### Ms. Claire Amato

## B. Write flora or fauna

| the snake      | the carob    |  |
|----------------|--------------|--|
| the thistles   | the ladybird |  |
| the robin      | the crab     |  |
| the Araar tree |              |  |

# C. Match by writing the number in the empty space

| 1 | Trees are types of plants that      |   | from the sun's rays in summer.     |
|---|-------------------------------------|---|------------------------------------|
| 2 | In trees we find animals such as    | 1 | have wooden trunks.                |
| 3 | Trees provide us with fruit         |   | the carob and the pine.            |
| 4 | Some names of trees are             |   | such as apples, oranges and pears. |
| 5 | When many trees grow close together |   | birds and butterflies.             |
| 6 | Trees offer shade                   |   | we have forests.                   |

# D. Fill in the blanks with the words provided.

| trees | chameleons | The roads | plants | Buskett | lemons | The trunk |   |
|-------|------------|-----------|--------|---------|--------|-----------|---|
|       |            |           |        |         |        |           | ĺ |

| 1. | Trees are types of                               | which grow tall                                  | er than pe | eople.   |  |
|----|--------------------------------------------------|--------------------------------------------------|------------|----------|--|
| 2. |                                                  | of trees thickens by time.                       |            |          |  |
| 3. | In                                               | we find trees such as carob, pind                | e and oak. |          |  |
| 4. | Trees give us a lot of fruit, s                  | uch as                                           | and almor  | nds.     |  |
|    | In trees we find many creature and caterpillars. | res such as                                      |            | <b>A</b> |  |
| 6. |                                                  | and our valleys look livelier and mer            | re         |          |  |
|    | beautiful because of trees.                      |                                                  |            |          |  |
| 7. | We should look after the                         | look after the we have left as these are becomin |            |          |  |
|    | very scarce.                                     |                                                  |            |          |  |
|    |                                                  |                                                  |            |          |  |
