

Year 6 GEOGRAPHY: G.6.1.1.

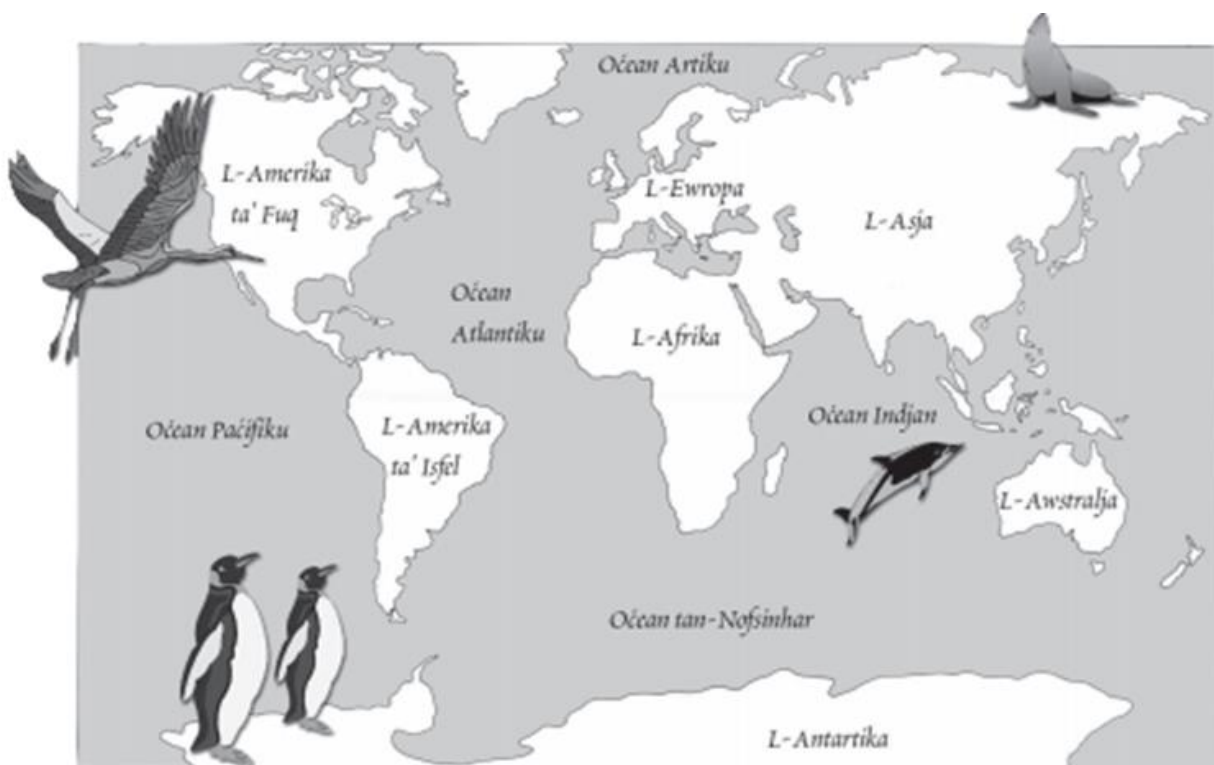

Where are we found?

The Maltese Islands can be found in the Southern part of Europe, or at the lower end of the Mediterranean Sea. The word Mediterranean means '**central sea**'. This sea connects with three huge continents; Africa, Europe and Asia.

The Continents and the Oceans

All the Earth's land mass is divided into six large areas called continents. In each continent we can find many countries. The continents are called America, Africa, Europe, Asia, Australia and Antarctica. These continents are surrounded by huge seas called oceans. So an ocean is a very large sea, much larger than the Mediterranean Sea which surrounds the Maltese Islands. There are five large oceans, which are called; the Southern Ocean, the Pacific, the Indian Ocean, the Arctic, and the Atlantic Ocean.

Insert the following data to show exactly where we are located:

Class: _____

School: _____

Street: _____

Town / Village: _____

Planet: _____

Region: _____

Continent: _____

Economic Block: _____

Planet: _____

Malta is part of Europe. Europe is a small continent (only Australia is smaller) but many people live in it. There are more than 40 countries in Europe, and 28 of these, including Malta are members of the European Union.

One of the main aims of the EU is to facilitate commerce between member states. The European Union also strives for a cleaner environment in its member countries, so that citizens will have a better life.

People living in EU countries can travel without any problems between countries and they can work in any of the EU countries. Some member states of the UE have a common currency called the euro.

Join these sentences and write them correctly below:

Look at world map or a world globe to fill in the table below:

In which continent are these countries found?			
Italy		Libya	
China		India	
Brazil		United States	
Malta		Egypt	
England		Canada	
Japan		Russia	
Spain		Germany	

Fill in the world map below as follows:

- Colour all the continents as indicated.

Australia	red
America	yellow
Europe	green
Africa	brown
Asia	grey
Antarctica	white

- Write the name of each continent in the right place on the map.
- Colour all the oceans in blue.
- Write the name of each ocean in the right place.
